(54) Title: IMAGE PROCESSING SYSTEM

(57) Abstract: This invention relates to an image processing system for capturing images from an event and for distributing images so obtained to one or more clients. The system may comprise a terminal associated with a camera and a first editing facility, wherein the terminal is configured to receive a master image file corresponding to an image of the event captured by the camera to store the master image file, to create a preview image file of a smaller file size, and to transmit the preview image file to the first editing facility, and wherein the first editing facility is configured to transmit a preview image file to a client.
